

## SECURITY TAPE – S-type

- ❖ The tamper evident security tape is a convenient and secure way to prove the closed state of goods. Opening attempts or any tampering during shipping or storage will not remain without a trace.
- ❖ When peeled off its lower layer remains on the surface of application and „VOID OPEN” or „VOID OPENED” hidden message appears. This text becomes visible on the surface of the tape as well. Reinstating the tape without trace is not possible.
- ❖ Designed to be especially efficient on cardboard boxes, impregnated, or laminated surfaces.
- ❖ Shipped in rolls.
- ❖ Freezing temperature: -40°C. Holding power at +60°C >24 hrs
- ❖ Application should be done with great care. Apply the tamper evident security tape by pressing down either using a handheld tape dispenser or by hand. (In the latter case it may be necessary to repeatedly smooth down the edges of the tape.) If the tape is rolled down too fast, the void message may appear because of the tape’s sensitivity.
- ❖ Recommended application temperature: between +15°C to +25°C.
- ❖ The quality of the void message depends on the quality of the application surface. In the interest of proper usage testing the security tape is a must before applying it on the application surface in the application circumstances.
- ❖ Recommended storage: between +10°C and +20°C, and away from direct sunlight, in a closed box.
- ❖ Order of customised version, other colors over certain quantities is possible.

Stock version	Dimensions (mm)	Material	Further marking	
Colour: Green, Void message: „VOID OPEN”	48 mm x 50 m/roll Without perforation Without sequential numbering	PET foil with acrylic adhesive	Standard stock version only. Further customisation of the stock version is not possible.
