

SECURE SEAL

- ❖ Re-usable, with event-unique random security number generation
- ❖ Random number security
- ❖ Provides the highest level of security

- ❖ This seal is not for resisting forcible entry but for preventing proofless stealing and illegal manipulation.
- ❖ Suitable for rigid, articulated, curtain-sided and box vehicles. Will operate on roller shutter or barn doors or cargo doors of goods vehicles.
- ❖ Provides the highest level of security at the lowest operating costs. Guaranteed for 50,000 operations, equivalent to over 10 years average usage.
- ❖ The seal mechanism secures a multi-strand steel cable threaded through the door catch mechanism, preventing door opening without opening the seal. Closing the seal automatically locks it and generates a new random 5 digit security number, displayed through a window in the seal housing. Opening the seal scrambles this number to an unreadable condition. The security number displayed after seal closure at despatch is recorded on the load manifest and should still correspond at delivery. Any deviation from the recorded number indicates unauthorised opening of the seal.

Secureseal: in standard form, one end of the cable is held permanently in the plunger keyway by a roll pin.
